## NOTES:

>> The lightest x-ply, gives great strength and stability.

>> On/Off profile gives to the sail a self and live adjusting profile.  
On mode: sail with power profile, for great control, speed and air time.  
Off mode: sail with flat profile and no power, for rides and manoeuvres.

>> Maintains the correct profile (shape) of the sail even in overpower conditions.

>> Outline dyneema Leech protection for extra strength and control.
